

Carousel Adult Program

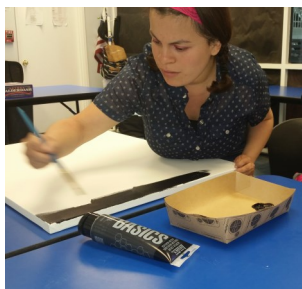

June 2015 Newsletter

What happened last month?

During the month of May, consumers participated in weekly cooking activities preparing food items such as steamed veggies, scrambled eggs, and grilled cheese. These easy to cook dishes allow consumers to assist in preparing food with little to no assistance.

Consumers also went on a trip to visit the Science Center to learn about ecosystems, air and space, and about the world of life. They were able to visit the endeavor exhibit which displayed photos, videos, and the actual spacecraft that went into space.

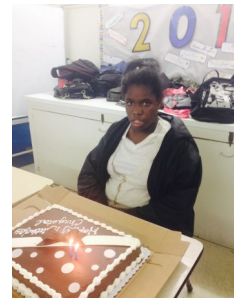

As summer approaches, carousel staff is working on informing consumers about the importance of drinking water and wearing comfortable appropriate clothes for the weather. It is important to make sure that we take care of ourselves in the upcoming season.

Carousel places a lot of emphasis on keeping the world green and as a result we make sure that consumers are consciousness about the things they do everyday. Consumers are reminded to reduce the amount of water we use and to recycle their waste properly.
